NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(1) General Business

The interim financial data is unaudited; however, in our opinion, it includes all adjustments, consisting only of normal recurring adjustments necessary for a fair statement of the results for the interim periods. The financial statements included herein have been prepared pursuant to the SEC's rules and regulations; accordingly, certain information and footnote disclosures normally included in GAAP financial statements have been condensed or omitted.

The results of operations and cash flow for the 2011 period are not necessarily indicative of the results to be expected for future quarters or for the year ending December 31, 2011. To maintain consistency and comparability, certain amounts at December 31, 2010 have been reclassified to conform to the September 30, 2011 presentation.

Our organization and business, the accounting policies we follow and other information, are contained in the notes to our consolidated financial statements filed as part of our 2010 Form 10-K. This quarterly report should be read in conjunction with such 10-K.

The consolidated financial statements include the accounts of Hallador Energy Company (the Company) and its wholly-owned subsidiary Sunrise Coal, LLC (Sunrise). All significant intercompany accounts and transactions have been eliminated. We are engaged in the production of steam coal from a shallow underground mine located in western Indiana. We own a 45% equity interest in Savoy Energy L.P., a private oil and gas company which has operations in Michigan, and a 50% interest in Sunrise Energy LLC, a private entity engaged in coal bed methane gas operations in the same vicinity as our coal mine.

(2) Stock Options

On January 7, 2010, we allowed four Denver employees (non officers) a one-time opportunity to relinquish 1/3 of their vested options (115,833) for cash of \$679,000; the intrinsic value on such date. This transaction was treated as a charge to equity. On January 7, 2011, we allowed the same four Denver employees (non officers) an opportunity to relinquish their remaining options (234,167) for 181,261 shares of our common stock. The exchange ratio was based on the intrinsic value of their options. These shares were issued under our Stock Bonus Plan which was created in December 2009. Under such plan our employees are allowed to relinquish shares to pay for their income taxes; accordingly, 41,645 shares were relinquished resulting in about 140,000 shares being issued. We now only have 200,000 outstanding stock options held by our CEO.

(3) Notes Payable

In December 2008, we entered into a loan agreement with a bank consortium that provides for a \$40 million term loan and a \$30 million revolving credit facility. At September 30, 2011, we owed \$20 million on the term loan. We pay a 1/2% annual commitment fee on the \$30 million line of credit. Substantially all of Sunrise's assets are pledged under this loan agreement and we are the guarantor. The loan agreement requires customary covenants, including financial ratios and restrictions on distributions. The current interest rate is LIBOR- one month (0.22%) plus 2.50% or 2.72%.

In the past we used bank letter of credits for our reclamation bonds. In June 2011, we replaced the letters of credit with surety bonds.

In 2006 we entered into two agreements swapping variable rates for fixed rates. Considering the two swap agreements, commitment fees and amortization of the closing costs, our current interest rate is about 7.7%. One of the swaps expires in December 2011 and the other in July 2012. Accounting rules require us to recognize all derivatives on the balance sheet at estimated fair value. Derivatives that are not hedges must be adjusted to estimated fair value through earnings. We have no derivatives designated as a hedge. The recorded value of our bank debt approximates fair value as it bears interest at a floating rate.

(4) Equity Investment in Savoy

We own a 45% interest in Savoy Energy L.P., a private company engaged in the oil and gas business primarily in the State of Michigan. Savoy uses the successful efforts method of accounting. We account for our interest using the equity method of accounting.

Below (in thousands) are a condensed balance sheet at September 30, 2011 and a condensed statement of operations for the nine months ended September 30, 2011 and 2010.

(5) Equity Investment in Sunrise Energy

In late December 2010, we invested \$2.375 million for a 50% interest in Sunrise Energy, LLC which then purchased existing gas reserves and gathering equipment from an unrelated third party with plans to develop and operate such reserves. Sunrise Energy also plans to develop and explore for coal-bed methane gas reserves on or near our underground coal reserves. They use the successful efforts method of accounting. We account for our interest using the equity method of accounting.

Below (in thousands) are a condensed balance sheet at September 30, 2011 and a condensed statement of operations for the nine months ended September 30, 2011.

Nine months ended

See "MSHA Reimbursements" below for a discussion of the \$1.9 million.

(7) Self Insurance

We continue to self-insure on about \$85 million (historical cost) of our underground mining equipment. We feel comfortable with this decision as such equipment is allocated among five mining units spread over ten miles.

(8) Gain on Sale

See "North Dakota Lease Play" below for a discussion of the \$9.1 million gain on sale.

ITEM 2. MD&A

THE FOLLOWING DISCUSSION UPDATES THE MD&A SECTION OF OUR 2010 FORM 10-K AND SHOULD BE READ IN CONJUNCTION THEREWITH.

Our consolidated financial statements should be read in conjunction with this discussion.

Overview

The largest portion of our business is devoted to underground coal mining in the State of Indiana through Sunrise Coal LLC (a wholly-owned subsidiary) serving the electric power generation industry. We also own a 45% equity interest in Savoy Energy, L.P., a private oil and gas company with operations in Michigan. In late December 2010, we invested \$2.4 million for a 50% interest in Sunrise Energy, LLC which then purchased existing gas reserves and gathering equipment from an unrelated third party with plans to develop and operate such reserves. Sunrise Energy also plans to develop and explore for coal-bed methane gas reserves on or near our underground coal reserves. We account for our investments in Savoy and Sunrise Energy using the equity method. Through our Denver operations we also lease oil and gas mineral rights with the intent to sell the prospects to third parties and retain an overriding royalty interest (ORRI) or carried interest. Occasionally, we participate in the drilling of oil and gas wells. A more in-depth discussion of Savoy follows.

Project Update

New Reserve (unassigned) - Allerton

The paragraph below is derived from our 2010 Form 10-K. We have no additional substantive comments regarding the Allerton reserve at this time.

We have leased roughly 20,000 acres in Vermillion County, Illinois near the village of Allerton. Based on our reserve estimates we currently control 26.2 million tons of recoverable coal reserves; 10.7 million which are proven and 15.5 million which are probable. A considerable amount of our 20,000 acres of leases has yet to receive any exploratory drilling, thus we anticipate our controlled reserves to grow as we continue drilling in 2011. We anticipate receiving a mining permit in early 2013 and to be mining coal in 2014. Unassigned reserves represent coal reserves that would require new mineshafts, mining equipment and plant facilities before operations could begin on the property. The primary reason for this distinction is to inform investors which coal reserves will require substantial capital expenditures before production can begin.

Outlook

Our long term view of the supply/demand dynamics in the domestic steam coal markets remains positive. We expect modest increases in U.S. coal demand in 2011, followed by greater recovery in 2012 led by stronger economic growth and manufacturing activity. As disclosed in our 2010 Form 10-K essentially all our 2011 production is under contract and 85%- 90% for 2012 and 2013 is under contract. Only about 1/3 of 2014 production is under contract and we have no contracts beyond 2014.

MSHA Reimbursements

Two of our major coal contracts allow us to pass on certain costs incurred resulting from changes in costs to comply with mandates issued by MSHA or other government agencies. In late December 2010, we submitted a report which was reviewed by an outside consulting firm engaged by our customers. In January 2011 the two customers agreed to reimburse us about \$1.9 million of such costs incurred by us during 2008 and 2009. During those years we were not able to accurately estimate what the ultimate outcome of these reimbursable costs would be so we did not record them until we were certain of the amounts. Such amounts were recorded during the first quarter of 2011.

We are in discussions with the same two customers regarding such costs incurred by us during 2010. In early September 2011 we submitted \$4 million of MSHA cost reimbursements. Our customers engaged a third party consultant to review these costs and we expect a final resolution in mid December. Until such discussions are finalized and the amounts agreed upon, no accounting recognition will occur.

Oil and Gas Properties

ORRI

We have an ORRI of about 2% on 22,500 acres and a 4% ORRI on 2,500 acres in Laramie County, Wyoming. This ORRI was obtained from leases we sold to SM Energy Company (formerly St. Mary Land) (NYSE:SM) in October 2008 for \$2 million. This is a Niobrara oil shale play in the northern D-J Basin. During 2010, SM Energy drilled a discovery well (the Atlas 1-19) on this acreage. During 2011 two additional wells were drilled and completed on our acreage. SM has permitted 16 additional drilling locations for this prospect for 2011-2012. For the first nine months of 2011 we received \$52,000 from these ORRI's.

North Dakota Lease Play

We invested about \$2.5 million in a lease play located in Slope, Hettinger and Stark counties of North Dakota which resulted in the purchase of about 10,600 net acres of oil and gas leases.

On June 10, 2011, we signed a letter of intent with Chesapeake Energy Corporation to sell such acreage and on July 29, 2011, the deal closed. The buyer purchased a 90% working interest for \$12.6 million resulting in a pre-tax gain of about \$9.1 million considering selling expenses and non-executive employee bonuses. We retained a 10% working interest and an approximate 3% average ORRI. We expect to receive up to an additional \$1.6 million during the 4th quarter of 2011, upon completion of title curative and delivery of additional leases all of which will be reported as an additional gain.

Albrecht and Associates headquartered in Houston was engaged to market this prospect on our behalf. The prospect was marketed as a Bakken/Three Forks oil shale play. The leases predominantly have five-year terms plus options to extend for an additional two to three years.

45% Ownership in Savoy

Savoy operates almost exclusively in Michigan. They have an interest in the Trenton-Black River Play in southern Michigan. They hold 250,000 gross acres (about 125,000 net) in Hillsdale and Lenawee counties. During 2010, Savoy drilled 11 wells (gross) in this play of which two were dry and nine were successful. During 2011, Savoy drilled 14 wells, of which 9 were successful and five were dry holes. Six more wells are planned for the fourth quarter of 2011. Drilling locations in this play are identified based on the evaluation of extensive 3-D seismic shoots. Savoy operates their own wells and their working interest averages between 40% and 50% and their net revenue interest averages between 34% and 42%. Savoy's net daily oil production currently averages about 811 barrels of oil. Oil and liquids make up about 98% of their oil and gas revenue.

The first nine months of 2011 may or may not be indicative for all of 2011 due to (i) the uncertainty of the outcome of Savoy's drilling activity; (ii) the extent of their seismic activity (G&G costs) and (iii) the sustainability of high oil prices. Savoy does no price hedging.

The table below illustrates the growth in Savoy comparing the first nine months of 2011 to 2010 (in thousands except oil prices):

	2011	2010
Revenue:		
Oil	\$ 18,816	\$ 6,623
Gas	437	591
NGLs (natural gas liquids)	490	113
Contract drilling	2,573	1,069
Other	486	525
Total revenue	22,802	8,921
Costs and expenses:		
LOE (lease operating expenses)	2,920	1,554
Contract drilling costs	1,985	1,347
DD&A (depreciation, depletion & amortization)	2,692	1,700
G&G (geological and geophysical) costs	1,326	2,148
Dry hole costs	1,358	513
Impairment of unproved properties	2,507	2,064
Other exploration costs	255	136
G&A (general & administrative)	712	728
Total expenses	13,755	10,190
Net income (loss)	\$ 9,047	\$ (1,269)
Oil production in barrels	206	92
Average oil prices/barrel for the period	\$ 90.93	\$ 71.68

Liquidity and Capital Resources

For the first nine months of 2011, we generated about \$40 million in cash from operations. We do not anticipate any liquidity issues in the foreseeable future. We plan to fund future mine expansion at the Carlisle mine through a combination of draws from the remaining \$30 million on our revolver and cash from operations. Our capital expenditures budget for the remainder of 2011 is in the \$14-\$16 million range. When we develop the Allerton or another large reserve, we will explore increasing our debt and restructuring our existing credit facility.

We have no material off-balance sheet arrangements.

Results of Operations

Nine Months Ended September 30, 2011 vs. 2010

For the first nine months of 2011, we sold 2,386,000 tons of coal at an average price of \$42.02/ton. For the comparable 2010 period we sold 2,373,000 tons at an average price of \$42.41/ton. Assuming we have no spot sales, we expect our coal sales for the remainder of 2011 (fourth quarter) to be about 900,000 tons with an average price of around \$42.

The increase in "other income" is due to the MSHA reimbursements discussed above.

Operating costs averaged \$23.66/ton in 2011 compared to \$23.90 in 2010. Our mine employees totaled 320 at September 30, 2011 compared to 341 at September 30, 2010. We expect such costs to average \$23-\$25/ton for the remainder of 2011.

The increase in DD&A was due primarily to additions to our coal properties. Coal properties at September 30, 2011 were \$187 million compared to \$168 million at September 30, 2010.

SG&A increased primarily due to higher expenses related to the new Allerton reserve, costs associated with our NASDAQ listing and increases in certain salaries.

Interest expense is lower due to lower debt levels.

Savoy's activity is discussed above.

Our effective tax rate was 37% and we expect that rate to continue or decrease slightly for the remainder of 2011.

Three Months Ended September 30, 2011 vs. 2010

For the third quarter of 2011, we sold 805,000 tons of coal at an average price of \$42.45/ton. For the comparable 2010 period, we sold 811,000 tons at an average price of \$42.15/ton.

Operating costs averaged \$24.42/ton for the third quarter of 2011 compared to \$22.66 in 2010. We expect such costs to average \$23-\$25/ton for the remainder of 2011.

The increase in DD&A was due primarily to additions to our coal properties. Coal properties at September 30, 2011 were \$187 million compared to \$168 million at September 30, 2010.

SG&A increased primarily due to higher expenses related to the new Allerton reserve, costs associated with our NASDAQ listing and increases in certain salaries.

Interest expense is lower due to lower debt levels.

Savoy's activity is discussed above.

New Accounting Pronouncements

None of the recent FASB pronouncements will have any material effect on us.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Smaller reporting companies are not required to provide the information required by this item.

ITEM 4 T. CONTROLS AND PROCEDURES

Disclosure Controls

We maintain a system of disclosure controls and procedures that are designed for the purposes of ensuring that information required to be disclosed in our SEC reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our CEO and CFO as appropriate to allow timely decisions regarding required disclosure.

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our CEO and CFO, of the effectiveness of the design and operation of our disclosure controls and procedures. Based upon that evaluation, our CEO and CFO concluded that our disclosure controls and procedures are effective for the purposes discussed above.

There has been no change in our internal control over financial reporting during the quarter ended September 30, 2011 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II - Other Information ITEM 5. OTHER INFORMATION

2012 Annual Meeting

Our annual shareholders' meeting is scheduled for Thursday afternoon April 19, 2012 in New York City at a yet to be determined location in upper Manhattan.

Yorktown Distribution

As previously disclosed, each time after we filed our 2011 Form 10-Qs for the first and second quarters, we were advised by Yorktown Energy Partners VI, L.P., an investor for the last six years, that it had distributed 750,000 shares (1,500,000 in total) of Hallador common stock to its limited and general partners. After the two distributions, Yorktown and its affiliates collectively hold about 13.75 million shares of Hallador common stock representing about 49% of total shares outstanding.

While we do not know Yorktown's ultimate strategy to realize the value of their Hallador investment for their partners, we expect that over time distributions such as these will improve our liquidity and float. If and when we are advised of another Yorktown distribution after this Form 10-Q is filed, we will timely report such on a Form 8-K.

Mine Safety

Our principles are safety, honesty, and compliance. We firmly believe that these values compose a dedicated workforce and with that, come high production. The core to this is our strong training programs that include accident prevention, workplace inspection and examination, emergency response, and compliance. We work with the Federal and State regulatory agencies to help eliminate safety and health hazards from our workplace and increase safety and compliance awareness throughout the mining industry. Sunrise has not had a fatality since its establishment in 2005.

Sunrise is regulated by the MSHA under the Federal Mine Safety and Health Act of 1977 (Mine Act). MSHA inspects our mine on a regular basis and issues various citations and orders when it believes a violation has occurred under the Mine Act. We present information below regarding certain violations which MSHA has issued with respect to our mine. While assessing this information please consider that the number and cost of violations will vary depending on the MSHA inspector and can be contested and appealed, and in that process, are often reduced in severity and amount, and are sometimes dismissed. We are currently contesting 11 citations with MSHA; some involve the amount of the assessments and some involve the citation itself.

The disclosures listed below are provided pursuant to the recently enacted Dodd-Frank Act. We believe that the following disclosures comply with the requirements of the Dodd-Frank Act; however, it is possible that future SEC rule making may require disclosures to be filed in a different format than the following.

Sunrise has not been issued written notice from MSHA of a pattern of, or the potential to have a pattern of, violations of mandatory health or safety standards that are of such a nature as could significantly and substantially cause and effect health or safety standards under section 104(e) of the Mine Act.

The table that follows outlines citations and orders issued to us by MSHA during the first nine months of 2011. The citations and orders outlined below may differ from MSHA's data retrieval system due to timing, special assessed citations, and other factors.

Definitions

Section 104(a) Significant and Substantial Citations "S&S": An alleged violation of a mining safety or health standard or regulation where there exists a reasonable likelihood that the hazard outlined will result in an injury or illness of a serious nature.

Section 104(b) Orders: Failure to abate a 104(a) citation within the period of time prescribed by MSHA. The result of which is an order of immediate withdraw of non-essential persons from the affected area until MSHA determines the violation has been corrected.

Section 104(d) Citations and Orders: An alleged unwarrantable failure to comply with mandatory health and safety standards.

Section 107(a) Orders: An order of withdraw for situations where MSHA has determined that an imminent danger exists.

Section 110(b)(2) Violations: An alleged flagrant violation issued by MSHA under section 110(b)(2) of the Mine Act.

Pattern or Potential Pattern of Violations: A pattern of violations of mandatory health or safety standards that are of such a nature as could have significantly and substantially contributed to the cause and effect of coal mine health or safety hazards under section 104(e) of the Mine Act or a potential to have such a pattern.

Contest of Citations, Orders, or Proposed Penalties: A contest proceeding may be filed with the Commission by the operator or miners/miners representative to challenge the issuance or penalty of a citation or order issued by MSHA.

Month	Section 104(a) Citations	Section 104(b) Orders	Section 104(d) Citation/Orders	Section 107(a) Orders	Section 110(b)(2) Violations	Proposed MSHA Assessments
						(in thousands)
January	1	0	0	0	0	\$10.00
February	2	0	0	0	0	11.00
March	2	0	0	0	0	7.70
April	4	0	0	0	0	6.00
May	3	0	0	0	0	16.00
June	2	0	0	0	0	30.00
