ADM Reports Adjusted Third Quarter 2014 Earnings of \$0.81 per Share

Adjusted EPS up 72 percent from year-ago period Net earnings of \$747 million, or \$1.14 per share

CHICAGO, Nov. 4, 2014 – Archer Daniels Midland Company (NYSE: ADM) today reported financial results for the quarter ended Sept. 30, 2014.

The company reported adjusted earnings per share¹ of \$0.81, up from \$0.47 in the same period last year. Adjusted segment operating profit¹ was \$914 million, up 45 percent from \$632 million in the year-ago period.

Net earnings for the quarter were \$747 million, or \$1.14 per share, and segment operating profit was \$1.07 billion.

"The team delivered very strong results in the third quarter and made significant progress improving earnings and returns," said ADM Chairman and CEO Patricia Woertz. "Corn Processing managed their product mix to serve good demand and optimize margins. Continued improvement in international merchandising results supported the ongoing recovery of Ag Services. And Oilseeds Processing again delivered solid results overall, benefiting from good demand and its diverse footprint and product portfolio.

"We also continued to advance our portfolio management. Since the beginning of the third quarter, we signed a deal to sell our global chocolate business; we reached an agreement to acquire Specialty Commodities Incorporated; and we completed our acquisition of WILD Flavors.

"In mid-October, we completed our previously announced buyback of 18 million shares, ahead of our year-end target. Given the strength of our balance sheet and our strong cash flows, we expect to repurchase up to 10 million more shares by the end of 2014."

Third Quarter 2014 Highlights¹

- Adjusted EPS of \$0.81 excludes approximately \$315 million in pretax LIFO income; a \$156 million pretax gain on the expansion of the ADM-Marubeni joint venture; and a \$102 million pretax loss on foreign exchange hedging of the WILD Flavors equity purchase. As a result of Euro depreciation, and net of these hedging losses, ADM's purchase price of the WILD Flavors equity was \$114 million below the price at signing.
- Oilseeds Processing was in line with last year's solid result, with the impact from slower farmer selling in South America offset by stronger global softseed, soybean and biodiesel results.
- Corn Processing increased \$176 million on improved margins in ethanol and sweeteners.
- Agricultural Services increased \$57 million, with improvements in international merchandising and transportation.
- Trailing four-quarter-average adjusted ROIC was 8.5 percent, up 280 basis points year over year.
- The net debt position of the company declined to \$0.7 billion, compared with \$3.4 billion at the end of the same period last year, which also resulted in a lower net interest expense.

¹ Non-GAAP financial measures; see pages 4 and 9 for explanations and reconciliations, including after-tax amounts.

Oilseeds Earnings Solid, with Lower South American Origination Offset by Improved Global Oilseed Processing, Biodiesel and Cocoa

Oilseeds operating profit of \$366 million was similar to the same period one year earlier.

Crushing and origination operating profit declined \$28 million to \$214 million. Softseed results improved significantly, driven primarily by European rapeseed margins and volumes. Soybean crushing results rose as South American and European operations saw higher capacity utilization and better margins. However, continued slow farmer selling limited origination volumes and profits in South America.

Refining, packaging, biodiesel and other generated a profit of \$96 million for the quarter, up \$11 million, with improved results from biodiesel in North America and Europe.

Cocoa and other earned \$30 million in the quarter, up \$20 million from the year-ago period, reflecting the improved margin environment and higher capacity utilization in the cocoa business.

Oilseeds results in Asia for the quarter were down \$3 million from the same period last year, principally reflecting weaker results from Wilmar International Limited.

Corn Processing Results Improved Significantly on Strong Performances Across the Segment

Corn processing operating profit nearly doubled from \$180 million to \$356 million.

Sweeteners and starches results increased \$63 million to \$171 million on steady volumes, with the expected lower average selling prices more than offset by the benefit of lower net corn costs.

Bioproducts results increased \$113 million to \$185 million driven by solid ethanol demand and margins through most of the quarter.

Agricultural Services Results Improve on International Merchandising and Transportation

Agricultural Services operating profit was \$159 million, up \$57 million from the year-ago period. This excludes a gain of \$156 million related to the expansion of the ADM-Marubeni joint venture, Pacificor, formerly the Kalama Export Company. Last year's result included approximately \$30 million related to intercompany insurance settlements.

Merchandising and handling earnings increased \$60 million to \$64 million, with significant improvements in international merchandising results more than offsetting the impact of the normal seasonal decline in U.S. export volumes until harvest began in September.

Transportation results increased \$14 million to \$35 million, with higher barge freight volumes and rates.

Milling and other results declined \$17 million to \$60 million on lower margins and volumes in the milling business.

Other Items of Note

This quarter's effective tax rate was 28 percent, versus 32 percent in the same period last year.

ADM incurred a \$102 million pretax loss on foreign exchange hedging of the WILD Flavors equity purchase. During the period from signing on July 5 to closing on Oct. 1, ADM progressively hedged the anticipated cash outflow related to the equity purchase. The Euro depreciated significantly, particularly in the month of September, resulting in losses on those hedges. As a result of the overall depreciation of the Euro, ADM's total purchase price of the equity, net of these hedging losses, was \$114 million lower than on July 5, when the purchase agreement was signed.

Included in Corporate results was a \$56 million loss related to updated valuations of CIP's portfolio of investments. ADM holds a 43.7 percent equity interest in CIP, a joint venture that targets investments in food, feed ingredients and bioproducts businesses.

As additional information to help clarify underlying business performance, the tables on page 9 include both adjusted EPS as well as adjusted EPS excluding significant timing effects.

Conference Call Information

ADM will host a conference call and audio webcast on Nov. 4, 2014, at 8 a.m. Central Time to discuss financial results and provide a company update. A financial summary slide presentation will be available to download approximately 60 minutes prior to the call. To listen to the call via the Internet or to download the slide presentation, go to www.adm.com/webcast. To listen by telephone, dial (888) 522-5398 in the U.S. or (706) 902-2121 if calling from outside the U.S. The access code is 14811848.

Replay of the call will be available from Nov. 5, 2014, to Nov. 11, 2014. To listen to the replay by telephone, dial (855) 859-2056 in the U.S. or (404) 537-3406 if calling from outside the U.S. The access code is 14811848. The replay will also be available online for an extended period of time at www.adm.com/webcast.

About ADM

For more than a century, the people of Archer Daniels Midland Company (NYSE: ADM) have transformed crops into products that serve the vital needs of a growing world. Today, we're one of the world's largest agricultural processors and food ingredient providers, with more than 33,000 employees serving customers in more than 140 countries. With a global value chain that includes more than 470 crop procurement locations, 285 ingredient manufacturing facilities, 40 innovation centers and the world's premier crop transportation network, we connect the harvest to the home, making products for food, animal feed, chemical and energy uses. Segment operating profit is ADM's consolidated income from operations before income tax excluding corporate items. Adjusted segment operating profit is segment operating profit adjusted, where applicable, for specified items and timing effects (see items denoted*). Timing effects relate to hedge ineffectiveness and mark-to-market hedge timing effects. Management believes that segment operating profit and adjusted segment operating profit are useful measures of ADM's performance because they provide investors information about ADM's business unit performance excluding corporate overhead costs as well as specified items and timing effects. Segment operating profit and adjusted segment operating profit are non-GAAP financial measures and are not intended to replace earnings before income tax, the most directly comparable GAAP financial measure. Segment operating profit and adjusted segment operating profit are not measures of consolidated operating results under U.S. GAAP and should not be considered alternatives to income before income taxes or any other measure of consolidated operating results under U.S. GAAP.

- (a) The company's pretax changes in its LIFO reserves during the period, tax effected using the Company's U.S. effective income tax rate.
- (b) Gain of \$156 million, pretax, upon the Company's effective dilution in the Pacificor (formerly Kalama Export Company) joint venture, resulting from the contribution of additional assets by another member in exchange for new equity units, tax effected using the Company's U.S. effective income tax rate.
- (c) The loss on Euro foreign currency derivative contracts to economically hedge the anticipated Wild Flavors acquisition of \$102 million, pretax, tax effected using the Company's U.S. effective income tax rate.
- (d) Relocation of the global headquarters to Chicago, Ill., costs related to integration of Toepfer following the acquisition of the noncontrolling interest, and other restructuring charges totaling \$31 million, pretax, tax effected using the applicable tax rates.
- (e) Charges, net of estimated tax, related to settlements with government agencies pertaining to potential violations of anti-corruption practices.
- (f) The asset impairment charges related to certain fixed assets and investments of \$23 million, pretax, tax effected using the Company's U.S. effective income tax rate.
- (g) Certain charges (gains) related to the Company's interest in GrainCorp, tax effected using the Company's U.S. effective income tax rate.
- (h) Impact to EPS due to the change in annual effective tax rate.
- (i) Corn timing effects for corn hedge ineffectiveness losses tax effected using the Company's U.S. effective income tax rate
- (j) Cocoa timing effects tax effected using the Company's effective income tax rate.

Adjusted EPS and adjusted EPS excluding timing effects reflect ADM's fully diluted EPS after removal of the effect on Reported EPS of certain specified items and timing effects as more fully described above. Management believes that these are useful measures of ADM's performance because they provide investors additional information about ADM's operations allowing better evaluation of ongoing business performance. These non-GAAP financial measures are not intended to replace or be an alternative to Reported EPS, the most directly comparable GAAP financial measure, or any other measures of operating results under GAAP. Earnings amounts in the tables above have been divided by the company's diluted shares outstanding for each respective quarter in order to arrive at an adjusted EPS amount for each specified item and timing effect.
