${ }^{(2)}$ Includes $\$ 3.7$ billion of loans to the oil and gas industry as of December 31, 2014, which was approximately $1.8 \%$ of total loans held for investment.
 combined period-end total of loans held for investment, REO and other foreclosed assets for each respective category. Nonperforming assets related to acquired loans are excluded from the calculation.
${ }^{4)}$ Includes the net realizable value of auto loans that have been charged down as a result of a bankruptcy filing and repossessed assets obtained in satisfaction of auto loans.
 as of January 1, 2014, losses related to these investments are now recognized, along with the associated tax benefits, as a component of income taxes attributable to continuing operations instead of non-interest expense. As such, losses related to these investments decrease the overall tax benefits recognized as a component of income taxes attributable to continuing operations and taxable-equivalent revenue in the Commercial Banking segment. This decrease in revenue is offset by an increase in revenue in the Other segment. Prior period amounts have been recast to conform to this presentation

## Reconciliation of Non-GAAP Measures

We report certain non-GAAP capital measures that management uses in assessing its capital adequacy. These non-GAAP measures include tangible common equity ("TCE") and tangible assets The tables below provide the details of the calculation of our non-GAAP capital measures and regulatory capital. While our non-GAAP capital measures are widely used by investors, analysts and bank regulatory agencies to assess the capital position of financial services companies, they may not be comparable to similarly titled measures reported by other companies
