NEWS RELEASE

INDEPENDENCE HOLDING COMPANY ANNOUNCES 2017 THIRD-QUARTER AND NINE-MONTH RESULTS

Stamford, Connecticut, November 9, 2017. Independence Holding Company (NYSE: IHC) today reported 2017 third-quarter and nine-month results.

Financial Results

Net income attributable to IHC per share increased 36% to \$.34 per share, diluted, or \$5,229,000, for the three months ended September 30, 2017 compared to \$.25 per share, diluted, or \$4,323,000, for the three months ended September 30, 2016. Net income attributable to IHC of \$24,496,000, or \$1.50 per share diluted, for the nine months ended September 30, 2017 decreased from \$114,769,000, or \$6.60 per share diluted, in the same period of 2016 primarily due to the gain on sale of IHC Risk Solutions, LLC ("Risk Solutions") in 2016.

The Company reported revenues of \$83,752,000 for the three months ended September 30, 2017 compared to revenues for the three months ended September 30, 2016 of \$78,542,000. The Company reported revenues of \$237,829,000 for the nine months ended September 30, 2017 compared to revenues for the nine months ended September 30, 2016 of \$232,133,000. Revenues increased primarily due to significant increases in specialty health premiums largely offset by a reduction in premiums from the exit of the Company's stop-loss business.

Chief Executive Officer's Comments

Roy T. K. Thung, Chief Executive Officer, commented, "We are pleased with the 36% increase in our earnings per share for the quarter primarily attributable to a substantial increase in sales and earnings from the specialty health segment. The sale of Risk Solutions and exiting the medical stop-loss segment generated not only a large gain on sale but also significant liquidity and excess capital, which we have partially redeployed by purchasing equity stakes in several companies that distribute our products, repurchasing IHC stock, paying off all of our debt, and improving our infrastructure in anticipation of growth in specialty health, and the group disability and DBL segment.

We are one of the fastest growing and most innovative underwriters of specialty health products in the United States. In addition to our own distribution, several of the largest national health insurers and e-brokers (including eHealth) are now distributing a significant amount of our products. We are recognized for our development of medical insurance packages (including IHC's Fusion product) that provide affordable coverage alternatives for consumers who either cannot afford Obamacare-compliant major medical health insurance coverages or who, because of increased subsidies, qualify for no cost Bronze plans under the Affordable Care Act, but need our supplemental products to cover their very high deductibles. We are also very well positioned for the expected increase in the duration of short-term medical plans as a result of the Trump Administration's executive order directing federal agencies to extend the duration of these products to 364 days, subject to state law. For all the preceding reasons, we believe that we will continue the solid sales growth we have been experiencing for the balance of 2017, and will report significantly higher earned premiums and income in this segment in 2018."

Mr. Thung continued, "Our marginal Federal tax rate is 35% and any reduction in the Federal tax rate, if the proposed tax reform legislation were to pass, would have a significant positive impact on our after tax earnings. During the first nine months of 2017, the Company repurchased an aggregate 2,211,629 shares of our common stock at a total cost of \$44.4 million primarily through a tender offer at a price per share of \$20.00, and through private purchases. Our parent company's balance sheet is very strong, we have no debt, and we still have substantial cash and un-deployed capital. Our book value is \$28.19 per share at September 30, 2017 compared to \$25.53 per share at December 31, 2016, and \$18.73 per share at December 31, 2015. Our overall investment portfolio continues to be very highly rated (on average, AA) and has a duration of approximately five years."
