DEARBORN, Mich., July 25, 2018 – Ford Motor Company today released its second quarter 2018 financial results. Company revenue, net income and Company adjusted EBIT were all down year over year mainly due to factors related to a North American production disruption at a parts supplier in the quarter, as well as ongoing challenges in the China market.

“This quarter we achieved solid results in North America, offset in part by unexpected challenges with our overseas operations and headwinds in the business environment,” said Jim Hackett, president and CEO. “Despite this, our fitness actions continue to take hold and we’re clearly committed to redesigning and restructuring the underperforming parts of our business.”

Ford continues to be focused on redesigning business models by reallocating capital to opportunities with higher returns, restructuring and leveraging strategic partnerships. New this quarter, the company announced that these activities could have potential EBIT charges of \$11 billion, with cash-related effects of \$7 billion, over the next three to five years.

“The team is making the hard decisions to raise the returns of underperforming assets where we can via fitness and alternative business models, and we will disposition the rest,” said Bob Shanks, executive vice president and CFO. “This type of profound redesign will take time, and we will communicate as decisions are made, such as exiting traditional sedan silhouettes in North America.”

The North America business remains strong, with F-Series sales topping 236,000 units in the second quarter and on a record-setting pace through the first six months of the year. While production in the quarter was impacted by a fire at Meridian Magnesium Products of America, the Ford team worked swiftly with its partners to deploy creative solutions to restart impacted operations in just eight days to help restore supply.

On Tuesday, the company announced the creation of Ford Autonomous Vehicles LLC which will include Ford’s self-driving systems integration, autonomous vehicle research and advanced engineering, AV transportation-as-a-service network development, user experience, business strategy and business development teams.

Outside of North America, it was a particularly challenging quarter for Asia Pacific and Europe. And due to those regions Ford is now lowering the range for full year 2018 adjusted earnings per share guidance, now guiding to an adjusted EPS of \$1.30 - \$1.50.

In Asia Pacific, the company is focused on China and taking urgent action to address underperformance. This includes improving cost competitiveness with aggressive fitness actions, localizing more product in China, as well as recruiting more local talent to key management positions. New products will also soon be entering the market, with 60 percent of the line-up being refreshed or new by the end of 2019.

* See endnote on page 4.

In Europe, Ford is aggressively attacking costs, driving improved capital efficiencies across the business, while allocating capital to the segments and products that can generate appropriate returns. Ford remains the light commercial vehicle leader in the region and Ranger remains the number one selling pickup. The company's future capital allocation plans will build on these strengths.

As a result of these ongoing efforts, the company is postponing its investor meeting, previously scheduled for September, and will reschedule when more specifics can be shared on global redesign and restructuring.

CAUTIONARY NOTE ON FORWARD-LOOKING STATEMENTS

Statements included or incorporated by reference herein may constitute “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are based on expectations, forecasts, and assumptions by our management and involve a number of risks, uncertainties, and other factors that could cause actual results to differ materially from those stated, including, without limitation:

- Ford’s long-term competitiveness depends on the successful execution of fitness actions;
- Industry sales volume, particularly in the United States, Europe, or China, could decline if there is a financial crisis, recession, or significant geopolitical event;
- Ford’s new and existing products and mobility services are subject to market acceptance;
- Ford’s results are dependent on sales of larger, more profitable vehicles, particularly in the United States;
- Ford may face increased price competition resulting from industry excess capacity, currency fluctuations, or other factors;
- Fluctuations in commodity prices, foreign currency exchange rates, and interest rates can have a significant effect on results;
- With a global footprint, Ford’s results could be adversely affected by economic, geopolitical, protectionist trade policies, or other events;
- Ford’s production, as well as Ford’s suppliers’ production, could be disrupted by labor disputes, natural or man-made disasters, financial distress, production difficulties, or other factors;
- Ford’s ability to maintain a competitive cost structure could be affected by labor or other constraints;
- Pension and other postretirement liabilities could adversely affect Ford’s liquidity and financial condition;
- Economic and demographic experience for pension and other postretirement benefit plans (e.g., discount rates or investment returns) could be worse than Ford has assumed;
- Ford’s vehicles could be affected by defects that result in delays in new model launches, recall campaigns, or increased warranty costs;
- Safety, emissions, fuel economy, and other regulations affecting Ford may become more stringent;
- Ford could experience unusual or significant litigation, governmental investigations, or adverse publicity arising out of alleged defects in products, perceived environmental impacts, or otherwise;
- Ford’s receipt of government incentives could be subject to reduction, termination, or clawback;
- Operational systems, security systems, and vehicles could be affected by cyber incidents;
- Ford Credit’s access to debt, securitization, or derivative markets around the world at competitive rates or in sufficient amounts could be affected by credit rating downgrades, market volatility, market disruption, regulatory requirements, or other factors;
- Ford Credit could experience higher-than-expected credit losses, lower-than-anticipated residual values, or higher-than-expected return volumes for leased vehicles;
- Ford Credit could face increased competition from banks, financial institutions, or other third parties seeking to increase their share of financing Ford vehicles; and
- Ford Credit could be subject to new or increased credit regulations, consumer or data protection regulations, or other regulations.

We cannot be certain that any expectation, forecast, or assumption made in preparing forward-looking statements will prove accurate, or that any projection will be realized. It is to be expected that there may be differences between projected and actual results. Our forward-looking statements speak only as of the date of their initial issuance, and we do not undertake any obligation to update or revise publicly any forward-looking statement, whether as a result of new information, future events, or otherwise. For additional discussion, see “Item 1A. Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2017, as updated by subsequent Quarterly Reports on Form 10-Q and Current Reports on Form 8-K.

NON-GAAP FINANCIAL MEASURES THAT SUPPLEMENT GAAP MEASURES

We use both generally accepted accounting principles (“GAAP”) and non-GAAP financial measures for operational and financial decision making, and to assess Company and segment business performance. The non-GAAP measures listed below are intended to be considered by users as supplemental information to their equivalent GAAP measures, to aid investors in better understanding our financial results. We believe that these non-GAAP measures provide useful perspective on underlying business results and trends, and a means to assess our period-over-period results. These non-GAAP measures should not be considered as a substitute for, or superior to, measures of financial performance prepared in accordance with GAAP. These non-GAAP measures may not be the same as similarly titled measures used by other companies due to possible differences in method and in items or events being adjusted.

- **Company Adjusted EBIT (Most Comparable GAAP Measure: Net income attributable to Ford)** – Earnings before interest and taxes (EBIT) includes non-controlling interests and excludes interest on debt (excl. Ford Credit Debt), taxes, and pre-tax special items. This non-GAAP measure is useful to management and investors because it allows users to evaluate our operating results aligned with industry reporting. Pre-tax special items consist of (i) pension and OPEB rereasurement gains and losses, (ii) significant restructuring actions related to our efforts to match production capacity and cost structure to market demand and changing model mix, and (iii) other items that we do not necessarily consider to be indicative of earnings from ongoing operating activities. When we provide guidance for adjusted EBIT, we do not provide guidance on a net income basis because the GAAP measure will include potentially significant special items that have not yet occurred and are difficult to predict with reasonable certainty prior to year-end, including pension and OPEB rereasurement gains and losses.
- **Company Adjusted EBIT Margin (Most Comparable GAAP Measure: Company Net Income Margin)** – Company Adjusted EBIT margin is Company adjusted EBIT divided by Company revenue. This non-GAAP measure is useful to management and investors because it allows users to evaluate our operating results aligned with industry reporting.
- **Adjusted Earnings Per Share (Most Comparable GAAP Measure: Earnings Per Share)** – Measure of Company’s diluted net earnings per share adjusted for impact of pre-tax special items (described above) and tax special items. The measure provides investors with useful information to evaluate performance of our business excluding items not indicative of the underlying run rate of our business. When we provide guidance for adjusted earnings per share, we do not provide guidance on an earnings per share basis because the GAAP measure will include potentially significant special items that have not yet occurred and are difficult to predict with reasonable certainty prior to year-end, including pension and OPEB rereasurement gains and losses.
- **Adjusted Effective Tax Rate (Most Comparable GAAP Measure: Effective Tax Rate)** – Measure of Company’s tax rate excluding pre-tax special items (described above) and tax special items. The measure provides an ongoing effective rate which investors find useful for historical comparisons and for forecasting. When we provide guidance for adjusted effective tax rate, we do not provide guidance on an effective tax rate basis because the GAAP measure will include potentially significant special items that have not yet occurred and are difficult to predict with reasonable certainty prior to year-end, including pension and OPEB rereasurement gains and losses.
- **Company Adjusted Operating Cash Flow (Most Comparable GAAP Measure: Net Cash Provided By / (Used In) Operating Activities)** – Measure of Company’s operating cash flow excluding Ford Credit’s operating cash flows. The measure contains elements management considers operating activities, including Automotive and Mobility capital spending, Ford Credit distributions to its parent, and settlement of derivatives. The measure excludes cash outflows for funded pension contributions, separation payments, and other items that are considered operating cash outflows under U.S. GAAP. This measure is useful to management and investors because it is consistent with management’s assessment of the Company’s operating cash flow performance. When we provide guidance for Company adjusted operating cash flow, we do not provide guidance for net cash provided by/(used in) operating activities because the GAAP measure will include items that are difficult to quantify or predict with reasonable certainty, including cash flows related to the Company’s exposures to foreign currency exchange rates and certain commodity prices (separate from any related hedges), Ford Credit’s operating cash flows, and cash flows related to special items, including separation payments, each of which individually or in the aggregate could have a significant impact to our net cash provided by/(used in) our operating activities.
