AMG Reports Financial and Operating Results for the Third Quarter and Nine Months Ended September 30, 2020

Company reports EPS of \$1.53, Economic EPS of \$3.27 in third quarter of 2020

- ▶ Net Income (controlling interest) of \$71 million, Economic Net Income of \$152 million
- Adjusted EBITDA of \$181 million, representing 12% growth versus prior quarter
- ▶ Repurchased approximately \$85 million in common stock
- ▶ Issued \$275 million 40-year hybrid bond, further extending balance sheet duration and enhancing liquidity

WEST PALM BEACH, FL, October 26, 2020 – Affiliated Managers Group, Inc. (NYSE: AMG) today reported its financial and operating results for the third quarter and nine months ended September 30, 2020.

Jay C. Horgen, President and Chief Executive Officer of AMG, said:

"AMG reported third quarter Adjusted EBITDA of \$181 million, representing 12% quarter-over-quarter growth, as strong Affiliate investment returns more than offset challenges in certain quantitative strategies. AMG's Affiliates continue to generate alpha across a broad array of distinctive equity and alternative strategies, and are well-positioned to benefit as clients recognize increasing asset dispersion and engage high-performing, active managers to navigate rapidly changing markets. Independent partner-owned boutiques have historically outperformed in periods of heightened volatility, and clients view the most skilled active managers as key contributors to achieving their long-term objectives, particularly in a low-yield environment.

"As business activity levels continue to normalize, we have increased our focus on investing for growth and are executing on our opportunity set across both existing Affiliates and new Affiliate prospects operating in areas of strong client demand. AMG's unique investment model enables us to scale our business without the risk or cost of integration. With our three-decade track record as the partner of choice to leading independent firms, our Affiliates' long-term organic growth opportunities, and our commitment to returning excess capital to shareholders, we are confident in our ability to generate strong earnings growth and create long-term shareholder value."

Notes

(1) As supplemental information, we provide non-GAAP performance measures of Adjusted EBITDA (controlling interest), Economic net income (controlling interest) and Economic earnings per share. Management utilizes these non-GAAP performance measures to assess our performance before our share of certain non-cash expenses and to improve comparability between periods.

Adjusted EBITDA (controlling interest) represents our performance before our share of interest expense, income taxes, depreciation, amortization, impairments, certain Affiliate equity expenses, gains and losses on general partner and seed capital investments, and adjustments to our contingent payment arrangements. We believe that many investors use this non-GAAP measure when assessing the financial performance of companies in the investment management industry.

Under our Economic net income (controlling interest) definition, we add to Net income (loss) (controlling interest) our share of pretax intangible amortization and impairments (including the portion attributable to equity method investments in Affiliates), deferred taxes related to intangible assets, and other economic items which include non-cash imputed interest (principally related to the accounting for convertible securities and contingent payment arrangements), certain Affiliate equity expenses, and gains and losses on general partner and seed capital investments. Economic net income (controlling interest) is used by management and our Board of Directors as our principal performance benchmark, including as one of the measures for aligning executive compensation with stockholder value.

Economic earnings per share represents Economic net income (controlling interest) divided by the Average shares outstanding (adjusted diluted). In this calculation, the potential share issuance in connection with our junior convertible securities is measured using a "treasury stock" method. Under this method, only the net number of shares of common stock equal to the value of the junior convertible securities in excess of par, if any, are deemed to be outstanding. We believe the inclusion of net shares under a treasury stock method best reflects the benefit of the increase in available capital resources (which could be used to repurchase shares of common stock) that occurs when these securities are converted and we are relieved of our debt obligation.

The following table provides a reconciliation of Average shares outstanding (adjusted diluted):

	Three Mon	ths Ended	Nine Mont	nths Ended		
(in millions)	9/30/2019	9/30/2020	9/30/2019	9/30/2020

Stock options and restricted stock units			0.0			
Average shares outstanding (adjusted diluted)	50.4	46.5	51.1	47.2		

These non-GAAP performance measures are provided in addition to, but not as a substitute for, Net income (loss) (controlling interest), Earnings per share or other GAAP performance measures. For additional information on our non-GAAP measures, see our Annual and Quarterly Reports on Form 10-K and 10-Q, respectively, which are accessible on the SEC's website at www.sec.gov.
